

PERSPECTIVES

Which Country Will Outperform? Here's Why It Shouldn't Matter.

SEP. 3, 2021

Investment opportunities exist all around the globe, but the randomness of global stock returns makes it exceedingly difficult to figure out which markets are likely to be outperformers. How should investors deal with this kind of uncertainty?

First, they should remember that it's challenging, at best, to predict a country's returns by looking at the past, as shown by the performance of global markets since 2001 (see **Exhibit 1**). In the past 20 years, annual returns in 22 developed markets varied widely from year to year. (Each color represents a different country, and each column is sorted top down, from the highest-performing country to the lowest.)

Exhibit 1
Most Favored Nations

ANNUALIZED RETURNS (%) 2001-2020

DNK Denmark 11.7	CHE Switzerland 6.7	NLD Netherlands 6.0	JPN Japan 3.7	PRT Portugal 0.7
NZL New Zealand 11.5	NOR Norway 6.6	DEU Germany 4.7	GBR United Kingdom 3.3	ITA Italy 0.6
AUS Australia 9.3	SWE Sweden 6.5	AUT Austria 4.4	BEL Belgium 3.1	
HKG Hong Kong 7.4	SGP Singapore 6.3	FRA France 3.9	FIN Finland 0.7	
USA United States 7.0	CAN Canada 6.1	ESP Spain 3.8	IRL Ireland 0.7	

Past performance is no guarantee of results. In USD. MSCI country indices (net dividends) for each country listed. Does not include Israel, which MSCI classified as an emerging market prior to May 2010. MSCI data © MSCI 2021, all rights reserved.

Two examples help make the point well:

- Austria posted the highest developed markets return in 2017—but the lowest the next year.
- The US ranked in the top five for annualized returns over the entire 20 years but finished first in the country rankings just once over that period. In nine calendar years, it was in the lower half of performers.

Investors can benefit from understanding that they don't need to predict which countries

will deliver the best returns during the next quarter, next year, or next five years. Why? Holding equities from markets around the world—as opposed to those of a few countries or just one—positions investors to potentially capture higher returns where they appear, and outperformance in one market can help offset lower returns elsewhere. Put another way, a globally diversified portfolio can help provide more reliable outcomes over time.

Diversification neither assures a profit nor guarantees against loss in a declining market.
